## **COPYRIGHT NOTICE**

A portion of the disclosure of this patent document contains material which is subject to copyright protection. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all copyright rights whatsoever. 37 CFR 1.71(d).

## **BACKGROUND OF THE INVENTION**

The following includes information that may be useful in understanding the present invention(s). It is not an admission that any of the information provided herein is prior art, or material, to the presently described or claimed inventions, or that any publication or document that is specifically or implicitly referenced is prior art.

### **1. Field of the Invention**

**[0001]** The present invention relates generally to the field of baby bottle devices and more specifically relates to an improved baby bottle apparatus having a baby bottle adapted to be filled with a liquid and any chosen additives and then releasably attached to a base member with the base member adapted to releasably connect with the bottle member and heat a liquid to a desired temperature and stir the liquid to mix any chosen additives added to the liquid before a baby sucks on the nipple and drinks the liquid.
